Little squares. A big reveal.

This pack includes one original worksheet for each number 0–9.

Name the target character at the top of the page together.

Find every matching character and colour its whole square.

Leave the other squares white. Colouring order does not matter.

The coloured squares form the same big letter or number.

Trace the character, circle its match, then count the dots.

Use one page at a time. Offer help with unfamiliar characters.

Print on ordinary A4 paper at 100% / actual size. No cutting needed.

Find 0. Reveal 0.

Every matching square is coloured.

All other squares stay white.

Use any crayon colour.

The answer pages show every reveal.

Zero has no dots in its ten-frame.

Count dots, not reveal-grid squares.

Keep it playful. Stop and return later if your child gets tired.
